SUMMARY

Professional Web Developer | Software Systems Engineer

An expert Web Developer and Software Systems Engineer with 5+ years of experience designing and deploying modern web platforms and scalable digital systems. Skilled in full-stack development using React, Next.js, Django, and Node.js, with strong expertise in building secure, high-performance web applications and database-driven platforms. Experienced in developing responsive user interfaces, optimizing system performance, and integrating RESTful APIs to support reliable digital services and applications.

EDUCATION

Open University of Kenya(OUK)

Building Generative AI Applications

Konza City, Kenya

Feb. 2026

Harvard University

Professional Certificates in Computer Science

edX, USA

2020 – Present

- Computer Science for Cybersecurity
- Computer Science for Python Programming
- Computer Science for Artificial Intelligence
- Computer Science for Web Programming
- Introduction to Computer Science

Open University of Kenya(OUK)

Bachelor of Science in Computer Science (Ongoing)

Konza City, Kenya

Sept. 2025 – Present

Kenyatta University(KU)

Bachelor of Commerce (Marketing)

Nairobi, Kenya

Aug. 2020 – May 2024

Chavakali High School

Kenya Certificate of Secondary Education (KCSE)

Vihiga, Kenya

Dec. 2019

St. Mary's Mixed Primary School

Kenya Certificate of Primary Education (KCPE)

Bomet, Kenya

Dec. 2015

EXPERIENCE

Web Developer & UI/UX Designer

BioAfri Solns Organization Website

Sept 2025 – Present

Narok, Kenya

- Designed and developed the official organizational website for BioAfri Solns, delivering a responsive and modern platform that communicates the company's waste-to-energy and biotechnology solutions.
- Implemented optimized web layouts, structured content architecture, and SEO metadata to improve search visibility and overall site performance.
- Maintained and updated the website's content, visuals, and design components to ensure consistent branding and an engaging user experience.
- Produced digital assets and visuals to support product communication and enhance the organization's online presence.

Web Developer & UI/UX Designer

UrbanKikapu E-commerce Platform

Nov 2024 – Aug 2025

Nairobi, Kenya

- Architected and developed a scalable electronics e-commerce platform designed to support product discovery, secure transactions, and high-performance browsing.
- Implemented server/client component separation with Incremental Static Regeneration (ISR) to improve page load performance and SEO efficiency.
- Built advanced product discovery features including debounced search, dynamic filtering, category segmentation, and brand-based grouping.
- Integrated secure authentication, Stripe-based payment processing, and optimized checkout workflows for seamless transactions.
- Enhanced platform performance and SEO using structured metadata, Open Graph tags, semantic content hierarchy, and Core Web Vitals optimization.

PROJECTS

Green Low-Technologies Ltd (GLT) Website | *React, TypeScript, Tailwind CSS, OpenAI API* April 2026 – Present

- Designed and developed a high-conversion corporate and investor-focused website for a sustainability-driven technology company, establishing a complete UI/UX design system from scratch.
- Architected a scalable, data-driven frontend using reusable React components and structured content models to support future expansion and maintainability.
- Built an AI-powered chatbot using retrieval-augmented generation (RAG) with vector embeddings, enabling intelligent, context-aware responses based on company knowledge.
- Structured and optimized content for SEO, improving discoverability through semantic hierarchy, keyword-focused copy, and performance optimization techniques.
- Integrated modern web features including responsive design, analytics, WhatsApp communication, and low-cost deployment using serverless infrastructure.

StoreIt Cloud Storage Platform | *Next.js, Tailwind CSS, Appwrite* May 2025 – Present

- Developed a secure cloud storage platform enabling users to upload, manage, and share digital files through a modern web interface.
- Implemented OTP-based authentication using Appwrite, eliminating traditional password workflows while maintaining secure user access.
- Built multi-format file upload and preview functionality supporting documents, images, audio files, and other media types.
- Designed a dynamic user dashboard that tracks and visualizes storage usage across file categories with automated allocation limits.
- Developed secure file-sharing functionality via email to enable controlled collaboration and document distribution.

Developer Portfolio V2 | *Vite, React.js, Zustand, GSAP, Tailwind CSS, Figma, Vercel* June 2023 – Present

- Engineered an interactive web application featuring a macOS-inspired interface with dynamic window and panel management.
- Implemented global state management using Zustand to coordinate window stacking, modal behavior, and interface interactions.
- Developed draggable and physics-based UI panels using GSAP for responsive interaction and smooth animation handling.
- Designed the full user interface system in Figma and translated high-fidelity prototypes into responsive Tailwind CSS layouts.
- Optimized application performance for production deployment on Vercel, achieving an A grade in performance and structure on GTmetrix.

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, Python, C/C++, SQL

Web Development: HTML5, CSS3, React.js, Next.js, Tailwind CSS

Backend & APIs: Node.js, Express.js, Django, Flask, RESTful API Development

Databases: PostgreSQL, MongoDB

Tools & Platforms: Git, Docker, Vercel, VS Code, Figma

Libraries & UI Tools: GSAP, Framer Motion, Zustand, shadcn/ui, Material UI, Vite

DevOps & Deployment: Docker, CI/CD workflows, Coolify
